PROFESSIONAL SUMMARY

Aspiring Quality Assurance (QA) Engineer and fourth-year BSIT student majoring in System Development at De La Salle Lipa, dedicated to software quality, system reliability, and meticulous bug detection. Experienced in designing test scenarios, executing manual test suites, and validating end-to-end functionality across web, mobile, and desktop applications. Seeking a Quality Assurance or Software Testing OJT role for 486 hours starting December 1, 2026 to apply testing methodologies and support software delivery excellence.

KEY SKILLS

QA & Software Testing: Manual Testing, Test Case Design, Test Planning, Bug Reporting & Tracking, Functional & Regression Testing, API Testing, Edge Case Validation, SDLC & STLC

Testing & Diagnostic Tools: Postman, Git, GitHub, Browser Developer Tools, JIRA

Backend & Database Environment Knowledge: Node.js, Express, Supabase, PostgreSQL, MySQL, Python, SQL Querying & Data Integrity Verification

Web & Mobile Stacks Tested: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Bootstrap, Flutter, React Native, C++

AI & Productivity Tools: ChatGPT, Microsoft Copilot, Claude, Gemini (used for test case generation, query optimization, and scenario building)

Soft Skills & Languages: Attention to Detail, Analytical Thinking, Problem Solving, Effective Communication, Team Collaboration | Tagalog, English

PROJECTS AND ACHIEVEMENTS

Barangay Safety – Incident Reporting Application with Geo-Tagging & Maps **September 2025 – October 2026**

Capstone Project: Quality Assurance Tester | System Stack Tested: Flutter, Supabase (PostgreSQL), Edge Functions

- Served as the primary QA tester for a multi-platform incident-reporting system built for five high-density barangays in Lipa City.
- Executed comprehensive manual test suites covering GPS geo-tagged reporting, real-time map rendering, heatmaps, and live responder tracking.
- Validated database auto-escalation triggers (pg_cron), API endpoints via Postman, row-level security (RLS), and signed image URLs to ensure data integrity and security compliance.
- Identified, logged, and re-tested defects across mobile and web interfaces, verifying resolutions prior to final capstone turnover.

Fedelicious Wings POS System **March 2025 – June 2025**

Academic Project: Quality Assurance & System Testing

- Performed functional, UI/UX, and regression testing on a Point of Sale (POS) desktop application designed for order management and sales tracking.
- Tested inventory auto-deduction algorithms, daily sales calculations, and receipt generation accuracy across multiple test scenarios.
- Documented edge-case input errors and interface flaws, collaborating with team developers to ensure clean data synchronization with backend storage.

EDUCATION

Bachelor of Science in Information Technology – Major in System Development **2023 – 2027 (Ongoing, 4th Year)**

De La Salle Lipa

CERTIFICATIONS

- **Python Essentials 1** – Cisco Networking Academy / OpenEDG Python Institute (March 24, 2026)
- **Cyber Threat Management** – Cisco Networking Academy (March 17, 2026)
- **Python Essentials 2** – Cisco Networking Academy / OpenEDG Python Institute (2026)
- **Skills to Succeed Academy: Workplace & Professional Readiness (58 Modules)** – Accenture (March 4, 2026)
  Focus areas: Professional Communication, Critical Thinking, Workplace Ethics, and Problem-Solving
